25

05:38:50 1 me.

05:38:50 2 THE COURT: Okay. That's fine. And I -- my staff  
05:38:52 3 just gave me -- do you want to know the totals of what you  
05:38:55 4 have left?

05:38:56 5 MR. DACUS: Please.

05:38:56 6 MR. SEARS: Please.

05:38:57 7 THE COURT: Plaintiff has 3 hours 49 minutes, and  
05:38:59 8 the defense has 4 hours 8 minutes.

05:39:03 9 MR. SEARS: 4:08?

05:39:04 10 THE COURT: 4:08, yes.

05:39:05 11 MR. SEARS: Thank you.

05:39:06 12 THE COURT: No, that's fine. So I'm going to have  
05:39:08 13 my lawyer, when we recess today, to give you copies of the  
05:39:12 14 charge and everything. So I think we'll plan on just  
05:39:15 15 meeting after we finish tomorrow, in chambers, to have an  
05:39:19 16 informal charge conference tomorrow evening, after we  
05:39:22 17 finish, just so that we're ready to go on -- and I know  
05:39:25 18 there were some disputes among the parties. I made my  
05:39:27 19 calls on those. You can certainly -- we can talk about  
05:39:30 20 those tomorrow, whether you agree or disagree with those  
05:39:33 21 calls that I've made. But we'll do that informally after  
05:39:36 22 we're done tomorrow.

05:39:36 23 Okay. Anything else, then?

05:39:38 24 MR. DACUS: No, your Honor.

05:39:39 25 THE COURT: Okay. Okay. We will be in recess,

03:01:24 1 before we recess?

03:01:26 2 MR. DACUS: No, your Honor.

03:01:26 3 THE COURT: Defense?

03:01:27 4 MR. SHELTON: No, your Honor.

03:01:28 5 THE COURT: Do y'all want the totals that are

03:01:31 6 left?

03:01:31 7 MR. DACUS: That would be great.

03:01:32 8 THE COURT: Okay. Plaintiff has 2 hours and 20

03:01:35 9 minutes left. Defense has 1 hour and 19 minutes.

03:01:39 10 MR. SHELTON: Thank you, your Honor.

03:01:40 11 THE COURT: Okay. See you back in 15.

03:01:42 12 (Recess, 3:01 p.m. to 3:19 p.m.)

13 (Open court, all parties present, jury not  
03:19:06 14 present.)

03:19:06 15 MR. SHELTON: Your Honor, we have an issue, first.

03:19:12 16 THE COURT: Hold on a second.

03:19:12 17 Yes.

03:19:12 18 MR. SHELTON: Your Honor, the last exhibit that  
03:19:14 19 was used -- it's not even an exhibit, hence the problem. I  
03:19:17 20 didn't -- I didn't notice or I didn't hear that there  
03:19:19 21 wasn't an exhibit number, and I wasn't given this exhibit.

03:19:23 22 And so when your Honor started the break, I went  
03:19:28 23 to Mr. Alberti and I said, you know, what is this? Because  
03:19:33 24 we looked at the transcript, and there was no exhibit  
25 number.

05:32:38 1 agree that JMOLs can be made orally?

05:32:42 2 MR. DACUS: We have no objection to that, your  
05:32:43 3 Honor.

05:32:45 4 MR. SEARS: Okay. Great. Thank you. Thank you.  
05:32:47 5 I had spoken with Mr. Raz earlier. He --

05:32:50 6 THE COURT: That's fine. I've done it both ways.  
05:32:52 7 That's not a problem.

05:32:53 8 And then do we have a couple attorneys who are  
05:32:55 9 going to handle the charge conference and -- let me ask you  
05:32:59 10 to -- this is your last witness, I presume?

05:33:02 11 MR. SEARS: Correct.

05:33:02 12 THE COURT: Okay. And then is there anybody in  
05:33:05 13 rebuttal?

05:33:05 14 MR. DACUS: Yes, your Honor. We've probably got  
05:33:07 15 an hour and 15 minutes of rebuttal, hour -- whatever we  
05:33:10 16 have left, that's what we have.

05:33:11 17 THE COURT: You have the time, so --

05:33:13 18 MR. DACUS: Right.

05:33:13 19 THE COURT: Let me get -- I know plaintiff has 11  
05:33:16 20 minutes left. Defense has an hour 30 -- I mean, plaintiff  
05:33:22 21 has an hour 30, and defense has 11 minutes.

05:33:27 22 MR. SEARS: Dang. I was hoping we --

05:33:29 23 THE COURT: Sorry. I said that wrong the first  
05:33:31 24 time. Sorry.

05:33:32 25 Okay. Well, if you need a break, if you want to

05:33:34 1 use the facilities or whatever, and then my lawyer can  
 05:33:37 2 bring you back here in like five minutes, and then we'll do  
 05:33:42 3 that in chambers.

4 (Proceedings adjourned, 5:34 p.m.)

5 COURT REPORTER'S CERTIFICATION

6 I HEREBY CERTIFY THAT ON THIS DATE, MARCH 4,  
 7 2021, THE FOREGOING IS A CORRECT TRANSCRIPT FROM THE RECORD  
 8 OF PROCEEDINGS.

25	COURT REPORTER'S CERTIFICATION	1197

1 concerned that we're about to hear that hardware is  
2 required for the claim. That's where the questions were  
3 going this morning, in a very skilled and roundabout way.  
4 That's where this argument lies. And the Court has said  
5 very clearly that it's not.

6 So I just raise it because I don't want to have to  
7 stand up in the middle of a closing.

8 THE COURT: I understand.

9 And I stand by the Court's ruling, and I'm going  
10 to overrule your motion.

11 MR. COBURN: Thank you, your Honor.

12 THE COURT: Anything else?

13 MR. COBURN: That's all I have, your Honor.

14 THE COURT: Okay. Anything from the plaintiffs?

15 MR. BELLOLI: Yes, your Honor. First, the 50(a)  
16 on invalidity under 102 and 103.

17 The defense expert didn't point to a single  
18 limitation in any asserted claim and point to where any  
19 limitation may be found in the prior art references.  
20 That's insufficient.

21 Generalized and conclusory statements about prior  
22 art and invalidity are not sufficient to survive a  
23 Rule 50(a) motion. The *Fresenius* case is directly on point  
24 here. That's 582 F.3d 1288 at 1300. That's the Federal  
25 Circuit in 2009.

1           There's tons of cases on point, as we've provided  
2           them to chambers.

3           But there was nothing.   There was really no  
4           invalidity case put on here as to 102 and 103.   And the  
5           *Frensenius* case says, you know, if an expert fails to  
6           identify where one limitation is missing in the prior art.  
7           So they do all the limitations but one and don't point to  
8           that, the opinion is out; the art is out.

9           And, here, we have a complete failure on any  
10          limitation to describe where they are in the prior art and  
11          link it in any way.   No claim was pointed to.

12          And just another point in the case law.   There is  
13          a lot of case law saying expert testimony is required for  
14          these matters of infringement and invalidity when they are  
15          of a technical nature like this.   And while there is expert  
16          testimony -- not on these points, so they can't just put  
17          the two documents, the two prior references, before the  
18          jury and say, look, we think they are invalid, that would  
19          be improper.

20          So that's the motion as to 102 and 103.

21          As to 112, there was enablement and written  
22          description.   Same issue.   Generalized and conclusory  
23          testimony is not sufficient for both flavors of 112 that  
24          they are proffering.

25          There is no specific reference in the transcript

1 to any claim or claim limitation. He just kind of says: I  
2 don't think this concept has support. But he doesn't link  
3 it to any asserted claim or claim limitation.

4 And so, under the *WBIP* case, the *Streck* case, the  
5 *CytoLogix* case, the *Alcon* case, these four cases we  
6 submitted to chambers, both of these defenses should go out  
7 as well.

8 One more reason to get rid of the enablement  
9 defense is that there is -- they never addressed the fact  
10 that -- whether or not a person of ordinary skill in the  
11 art could enable or, you know, use the invention without  
12 undue experimentation.

13 And there's case law -- and, in fact, the *Alcon*  
14 case, 745 F.3d 1180 -- I don't have the pinned cite, I'm  
15 sorry -- Federal Circuit 2014, that says when you don't  
16 address that issue JMOL is proper on enablement as well.

17 Sorry, a lot of concepts here this morning.

18 And, you know, finally, I think there may even be  
19 an implicit admission by defendants on this because the  
20 only case law they submitted was on written description,  
21 not 102, 103, or enablement.

22 And the one case they cite, the *Synthes* case, is  
23 not a 50(a) motion. It's where a Court found that --  
24 affirmatively found, made a finding, like on summary  
25 judgment or posttrial briefing, that, you know, as a matter

1 of law, the Court found that written description was  
2 lacking. It's not sufficiency of evidence or argument case  
3 under Rule 50.

4 And, again, we just think that it was way too  
5 general, way too conclusory; and, most importantly, just  
6 not directing the jury to any claim or claim limitation in  
7 making the argument. So we think the whole invalidity case  
8 fails as a matter of law.

9 THE COURT: Thank you.

10 Response?

11 MR. SHELTON: Thank you, your Honor.

12 I will freely admit that, as to Section 102, 103,  
13 and validity, the examination was limited by our time  
14 constraints. And so I want to focus your Honor on the  
15 Section 112 written description aspect of the invalidity  
16 case.

17 And, there, I don't think there is any question  
18 that Dr. van der Weide did provide detailed analysis. And  
19 it wasn't necessary, because of the nature of the written  
20 description defense here, to go into the claims and go  
21 element by element, because the issue there was -- and it  
22 was clearly framed in each of the questions that were posed  
23 to Dr. van der Weide -- was whether the asserted claims  
24 were supported by the specification with regard to whether  
25 the mobile device that's tested in the claims could be a

1 real mobile device.

2 So that was stated precisely as the predicate for  
3 each of the questions. And Dr. van der Weide -- so there's  
4 11 pages in the trial transcript, your Honor, starting on  
5 page 1120 yesterday. And in each case, Dr. van der Weide  
6 went through the four passages in the patents, and that  
7 same language is in each of the patents that are asserted,  
8 and Figures 1A and Figure 7. And Dr. van der Weide  
9 explained that each passage that the parties agreed  
10 constitutes the sole disclosure of testing on a physical  
11 mobile device.

12 And Dr. van der Weide presented opinion testimony,  
13 consistent with his expert report, that the written  
14 description requirement was not met. So I can't imagine  
15 what more he could have presented to the jury to allow a  
16 finding that the written description requirement has not  
17 been met here.

18 THE COURT: And let me ask: Are you conceding  
19 anticipation and obviousness?

20 MR. SHELTON: Yes, your Honor.

21 THE COURT: Okay. So based on your conceding  
22 that, I will grant the motion as to those two.

23 And then do you want to respond to the written  
24 description?

25 MR. BELLOLI: Are you conceding enablement as

1 well?

2 MR. SHELTON: We'll concede enablement.

3 MR. BELLOLI: Okay. So with written description  
4 again, it's just naked testimony about sections of the  
5 specification and figures. It's not tied to any claim.

6 He's not asked, you know, is this claim limitation  
7 lacking support. And it's just a couple of pages of the  
8 trial transcript. It's page 1120 to -- 1120 for both  
9 enablement and written description, so that's not all of  
10 it.

11 But, again, there is just no linking, and it's  
12 conclusory testimony. It's just: Does this  
13 specification -- does this cite support your opinion,  
14 essentially? Yes.

15 Does this figure support your opinion? Yes.

16 And then it's just conclusory. There is no  
17 explanation. You have to explain why the written  
18 description is lacking.

19 And, again, under the cases we submitted, such  
20 high-level generalized conclusory testimony is just not  
21 sufficient.

22 But I really think that where you can cut it off  
23 is it is just never linked to any claim in this case. He  
24 didn't give an opinion that this claim, this element,  
25 lacking written description.

1 And I would really just submit that there is nine  
2 pages. They are a pretty quick read. And if the Court  
3 sees those nine pages, it will agree that this was cursory  
4 and not sufficient and not pointing to any claim or claim  
5 limitation.

6 MR. SHELTON: Your Honor, I would make the same  
7 suggestion to the Court, that your Honor read the nine  
8 pages. And you will see that for each of the four  
9 passages, Dr. van der Weide wasn't just asked, does this  
10 support your opinion, which would be cursory and  
11 conclusory.

12 But, instead, he was asked, what would this teach  
13 a person of ordinary skill in the art and then is that  
14 sufficient, in your opinion, to show that the inventor  
15 possessed the full scope of the invention, which this Court  
16 has decreed involves testing on both emulated mobile  
17 devices and real mobile devices.

18 So if your Honor took, you know, a moment to read  
19 this testimony, I think you will see -- and, of course, you  
20 were here -- that that was more than ample support for the  
21 jury to find that the written description requirement has  
22 not been met for any of the six claims.

23 MR. BELLOLI: Okay. Last thing, your Honor, are  
24 just the slides that they showed.

25 Okay. All the slide says, was the inventor in

1 possession of the claimed invention? And it points to,  
2 like, a figure. It just points to figures. They never  
3 link it to any claim. They never link it to any claim in  
4 any way, shape, or form or specific claim limitation.

5           You have to have a claim limitation that fails the  
6 written description requirement of 112, and they just don't  
7 do it.

8           I don't know -- really, other than to formally  
9 brief this, I don't know how to put it out -- or to have  
10 the Court review the testimony and make a determination if  
11 it's too general, too conclusory, too cursory, and not  
12 linked to any claim or claim limitation. I think that's --

13           MR. SHELTON: Your Honor, may I read one question?

14           THE COURT: Go ahead.

15           MR. SHELTON: And this is from the -- this is the  
16 first element -- I'm sorry -- the first passage.

17           So I asked Dr. van der Weide --

18           MR. BELLOLI: What page again?

19           MR. SHELTON: I haven't said.

20           Trial transcript 1121, starting on line 18. And I  
21 asked Dr. van der Weide: "And what I'm going to do, sir,  
22 is I'm going to take you through each of those; and I'm  
23 going to ask you if, in your opinion, the passage will  
24 demonstrate to a person of ordinary skill in the art at the  
25 time of the invention that the inventor, Mr. Poulin,

1 actually invented the concept of meeting all the claim  
2 limitations that are asserted in this case but using a real  
3 mobile device as opposed to an emulator."

4 I mean, that sets the full necessary predicate.  
5 It's not conclusory, and it --

6 And then, in his answer --

7 THE COURT: Well, let me ask you: I mean, how  
8 does that meet clear and convincing evidence? You have to  
9 show that by clear and convincing evidence. And so how  
10 does that one question get you there?

11 MR. SHELTON: How does -- I'm sorry. What?

12 THE COURT: I mean, you have to show by clear and  
13 convincing evidence. And so, those nine pages and that  
14 question and answer you just gave me, how does that get you  
15 there?

16 MR. SHELTON: I just read the question, sir. I  
17 didn't read the answer.

18 THE COURT: Well, I understand. But, I mean...

19 MR. SHELTON: Well, when you're talking about  
20 written description, it supports that something is missing.  
21 And the parties agree that there is only four passages. He  
22 went through all four.

23 And his opinion was that it's not sufficient to  
24 show.

25 And he used Figure 1A and showed, for example,

1 that the authoring environment -- the authoring tool has a  
2 one-way arrow to the mobile device. It's not two-way.

3 And there's -- I mean, Dr. Malek admitted on  
4 cross-examination on Tuesday that every embodiment, every  
5 embodiment of all three patents, deals only with the  
6 emulator. That's their expert. He admitted that.

7 So there is no embodiment that teaches testing on  
8 a real mobile device that would meet the claim limitations,  
9 and the only four passages that the parties agree have  
10 anything to do with a real mobile device have been shown by  
11 a qualified expert to not have anything to do with meeting  
12 the limitations of the claims.

13 I can't imagine what more could have been done.  
14 And I think, your Honor, that it more than meets the clear  
15 and convincing evidence standard.

16 MR. BELLOLI: I think the question he asked and  
17 read, your Honor, as his best evidence of a question just  
18 says, did Mr. Poulin actually -- I mean, he's asking him  
19 basically did Mr. Poulin actually invent the concept of  
20 meeting all claim limitations that are asserted in this  
21 case.

22 You know, might as well just put the patent in  
23 front of the jury and say, hey, you figure out if a written  
24 description is here.

25 THE COURT: Okay. Well, of course, the Court

1 hates pulling things away from the jury. But in this  
2 situation I just don't see how the defense gets there,  
3 because the written description requires potential evidence  
4 that's not conclusory. And that's the problem, is the  
5 evidence you have is conclusory.

6 And, of course, in the case that's been cited to  
7 the Court, in *WBIP* 829 F.3d 1317, the Federal Circuit  
8 affirmed the District Court's denial of JMOL that the  
9 asserted claims lack written description.

10 There, the written description defense went to the  
11 jury, which found for the plaintiff. Defense appealed and  
12 argued the JMOL should have been granted.

13 While this is not in the same procedural stance,  
14 because the Court is faced with granting plaintiffs' JMOL  
15 as opposed to denying defendants' on invalidity, the  
16 Federal Circuit discussed the expert's testimony and  
17 explained why it was legally insufficient.

18 In *WBIP* the expert answered three questions on  
19 written description. The attorney was doing more  
20 testifying than the expert, as the attorney asked long,  
21 leading questions; and the expert replied succinctly and  
22 referred back to the slides.

23 The Federal Circuit said that the defendant never  
24 presented the jury with the detailed argument required to  
25 establish invalidity by written description.

1           The Federal Circuit called this general conclusory  
2 testimony that does not suffice as substantial evidence of  
3 invalidity. This evidence does not rise to the level of  
4 clear and convincing evidence, is a quote from the Federal  
5 Circuit.

6           Similarly, in this case, the defendants' expert  
7 addressed written description in, really, a quick fashion.  
8 While, in this case, it's more than three questions, it was  
9 approximately just five minutes of his testimony, total.

10           The attorney on direct examination asked long,  
11 leading questions, designed to speed things up. And the  
12 defendants' expert referred back to his slides so much that  
13 the transcript does not clearly state his opinions. This  
14 is the type of general, conclusory testimony that is  
15 legally insufficient to demonstrate invalidity.

16           And I looked at the case y'all had cited, and I've  
17 looked at the testimony as well. The case you cited -- is  
18 it -- I'm not -- it's S-Y-N-T-H-E-S. It was very  
19 different, and it had a lot more detailed testimony than we  
20 have in this case.

21           So I am going to grant the plaintiffs' motion and  
22 exclude the written description defense from going to the  
23 jury.

24           Anything else?

25           MR. BELLOLI: We do have kind of a four-part 50(a)

1 way, I'll come down and talk to you.

2 And we'll be in recess. Thank you.

3 (Proceedings concluded, 3:29 p.m.)

4 COURT REPORTER'S CERTIFICATION

5 I HEREBY CERTIFY THAT ON THIS DATE, MARCH 5,  
6 2021, THE FOREGOING IS A CORRECT TRANSCRIPT FROM THE RECORD  
7 OF PROCEEDINGS.
